Extreme Heat

A Timely "Extreme Heat" E-Learning Series to Use and Share June 15, 2022

- Activity: Rooftop Gardens
- Video: Chicago Fights Extreme Urban Heat With Greener Ideas
- Article: Heat Waves and Climate Change

Hello {First Name},

Extreme heat has been rising due to climate change, impacting health and ecosystems. Here are resources you can use to teach about heat-related topics in your classroom, including extreme urban heat, how the increase in heat waves is impacting communities, and how to build resilience in response to these challenges.

CLEAN Resource Feature: Activity

HANDS-ON ACTIVITY

Rooftop Gardens

What are the benefits of green roofs?

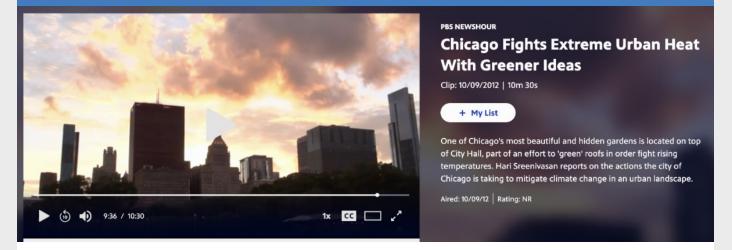

Students record the temperatures of their two model buildings, one with a black roof and the other covered with plants.

Activity: Rooftop Gardens

Audience: Middle School, High School, College (Lower)

This activity allows students to explore whether rooftop gardens are a viable option for combating the urban heat island effect. The guiding question is: Can rooftop gardens reduce the temperature inside and outside of houses? The activity takes about 2 hours with extra time for students to gather materials and develop design plans.

Video: Chicago Fights Extreme Urban Heat With Greener Ideas

Audience: Middle School, High School, College (Lower & Upper)

This segment from PBS's Coping with Climate Change series reports on the actions the city of Chicago is taking to mitigate climate change in an urban landscape. This piece is narrated by Hari Sreenivasan.

Article: Heat Waves and Climate Change

"Over the past decade, daily record high temperatures have occurred twice as often as record lows across the continental United States, up from a near 1:1 ratio in the 1950s. Heat waves are becoming more common, and intense heat waves are more frequent in the U.S.," says the Center for Climate and Energy Solutions.
